

TKS / Tootra Mathematics v6.1 - Formal Manual (Clean Definitions)

A Reference Document for Unambiguous Doctrinal Terminology

Based on: *THE SUPERIORITY OF TKS - The Tootra Kabbalistic System*

Purpose: Editorial clarification of language; no doctrinal changes

Canonical Authority Note: This document is the doctrinal and mathematical reference for TKS. The `tk-engine` implementation is a partial, evolving realization of this specification. Where discrepancies emerge between engine behavior and this manual, **this manual is canonical**; engine behavior must eventually be updated to match, not vice versa.

Table of Contents

- [1. The Ten Noetics \(Formal Definitions\)](#)
 - [2. Tootra Arithmetic - The Four Operations](#)
 - [3. The Four Worlds](#)
 - [4. The 40 Elements](#)
 - [5. The 7 Foundations and 28 Sub-Foundations](#)
 - [6. The 22 Acquisitions and D/W/P Structure](#)
 - [7. The Recursive Prerequisite Model \(RPM\) - Formal Structure](#)
 - [8. Cross-Reference Tables](#)
 - [9. Noetic Fractals – Structured Noetic Sequences](#)
-

Symbol Conventions (Elements vs Foundations vs Acquisitions)

This manual uses three distinct symbol namespaces. These must never be conflated.

Elements (40 Elements)

- Symbols:** A1–A10, B1–B10, C1–C10, D1–D10
- Pattern:** Capital letter + digits (e.g., A2, C7, D10)
- Role:** World-level modes representing the 10 Noetics manifesting through each of the four Worlds (Spiritual/Mental/Emotional/Physical).

Foundations (28 Sub-Foundations)

- Symbols:** 1a–7d
- Pattern:** Digit + lowercase letter (e.g., 3b, 5d, 7a)
- Role:** Life-domain structures representing the 7 Foundations × 4 World aspects.

Acquisitions (D/W/P, A22)

- Symbols:** D1–D7, W1–W7, P1–P7, A22
- Pattern:** Capital letter + digit (e.g., D3, W5, P6) or A22
- Role:** Desire/Wisdom/Power acquisitions tied to each Foundation, plus the global Meta-Desire A22.

Noetics (Operators)

- Symbols:** ^0–^9

- **Pattern:** Caret + digit (e.g., ^1, ^7)
- **Role:** Operators/aspects of consciousness that modify or tag other TKS values. Noetics are not standalone quantities.

Throughout this manual:

- "Element" refers only to A1–D10
- "Foundation" refers only to 1a–7d
- "Acquisition" refers only to D1–D7, W1–W7, P1–P7, A22
- "Noetic" refers only to ^0–^9
- "TKS value" refers to any Element, Foundation, or composite state that can participate in arithmetic

1. The Ten Noetics (Formal Definitions)

The **Noetics** are the ten fundamental operations or aspects of consciousness as Mind and Idea interact. They are indexed 0-9, with ^0 (Idea) serving as the neutral baseline.

1.1 Canonical Index

Index	Symbol	Name	Short Label
0	^0	Idea	Content/Thing
1	^1	Mind	Processor/Awareness
2	^2	Positive	Attraction/Affinity
3	^3	Negative	Aversion/Repulsion
4	^4	Vibration	Resonance/Impression
5	^5	Female	Receptivity/Composition (of Mind)
6	^6	Male	Structure/Composition (of Idea)
7	^7	Rhythm	Timing/Repetition
8	^8	Above/Cause	Trigger/Stimulus
9	^9	Below/Effect	Response/Result

1.2 Formal Definitions

Noetic 0 - Idea (^0)

Definition: The content itself; any "thing" inside or outside the Mind. All possible somethings.

Clarification: ^0 is the neutral baseline - the Idea as it is, before any particular mental relation is applied. This includes thoughts, objects, concepts, feelings, sensations, or any identifiable "thing" that can be processed by Mind.

Functional Role: The universal content that consciousness processes. The "data" in the Mind-as-processor model.

Noetic 1 - Mind (^1)

Definition: The various degrees of awareness that process, store, output, and take in Ideas.

Clarification: This is the aware processor. When ^1 is active, the Mind is actually noticing and working with an Idea. Mind is not a static container but a dynamic processor with varying degrees of engagement.

Functional Role: The processor that operates on Ideas. Directed attention; consciousness processing.

Noetic 2 - Positive (^2)

Definition: An Idea the Mind has affinity for and is attracted toward.

Clarification: This is the "yes" or "toward" relation. The Mind moves closer to this Idea, gives it energy and attention. Positive does not mean "good" in a moral sense; it means attractive to that particular Mind.

Functional Role: Attraction, desire, pull toward. The "want" relation between Mind and Idea.

Noetic 3 - Negative (^3)

Definition: An Idea the Mind is averse to and repelled by.

Clarification: This is the "no" or "away" relation. The Mind withdraws from this Idea, pushes it out, or resists it. Negative does not mean "bad" in a moral sense; it means aversive to that particular Mind.

Functional Role: Aversion, rejection, push away. The "don't want" relation between Mind and Idea.

Noetic 4 - Vibration (^4)

Definition: The degree to which an Idea resonates with the Mind; the Idea's vibratory impression on Mind.

Clarification: ^4 describes how strongly and in what pattern an Idea "rings" in the Mind when present. High vibration means the Idea makes a deep, lasting impression. Low vibration means weak or fleeting registration.

Functional Role: Resonance, impression strength, frequency of impact. How deeply an Idea "lands" in consciousness.

Noetic 5 - Female (^5)

Definition: A Mind impregnated with an Idea; the Ideas a Mind is composed of.

Clarification: This is the receptive aspect - Mind as a womb holding and organizing the Ideas that live inside it. Female (^5) represents the conditioning, beliefs, memories, and patterns that constitute a Mind's current composition.

Functional Role: Receptivity, internal composition of Mind. What the Mind already contains and how it is structured to receive new Ideas.

Noetic 6 - Male (^6)

Definition: An Idea impregnated with another Idea; the Ideas an Idea is composed of.

Clarification: This is the structural/compositional aspect - one Idea containing or shaping others inside itself. Male (^6) represents the internal structure and sub-components of any Idea.

Functional Role: Structure, content, internal composition of Ideas. The "what's inside" of any Idea.

Noetic 7 - Rhythm (^7)

Definition: The rate and pattern by which a Mind is exposed to an Idea, entraining and conditioning it.

Clarification: Rhythm is exposure over time - repeated contact in a pattern that trains the Mind into a habit or groove. Regular exposure creates entrainment; irregular exposure creates instability.

Functional Role: Timing, repetition, cycles. How often and in what pattern Mind encounters Idea.

Noetic 8 - Above/Cause (^8)

Definition: An Idea that triggers a different Idea than itself to come to Mind.

Clarification: ^8 is causal - it's the trigger or "above" Idea that calls something else into awareness. The Above/Cause Idea is the stimulus; what it triggers is the Below/Effect.

Functional Role: Trigger, cause, stimulus. The initiating Idea in a cause-effect chain.

Noetic 9 - Below/Effect (^9)

Definition: The Idea brought to Mind by an Above/Cause Idea or trigger.

Clarification: ^9 is the effect - the "below" Idea that appears because ^8 was present first. This is the response that follows the stimulus.

Functional Role: Result, effect, response. The resulting Idea in a cause-effect chain.

1.3 Noetic Interaction Summary

The Noetics form a complete system for describing how consciousness operates:

- **^0 (Idea)** - What is being processed
 - **^1 (Mind)** - What does the processing
 - **^2/^3 (Positive/Negative)** - The valence of the Mind-Idea relationship
 - **^4 (Vibration)** - The intensity of the Mind-Idea relationship
 - **^5 (Female)** - The current structure of Mind (receiving)
 - **^6 (Male)** - The current structure of Idea (being received)
 - **^7 (Rhythm)** - The temporal pattern of exposure
 - **^8/^9 (Above-Cause/Below-Effect)** - The causal chain between Ideas
-

2. Tootra Arithmetic - The Four Operations

The four arithmetic operations describe how Ideas combine, separate, amplify, and diminish in consciousness.

2.1 Operation Table

Operation	Symbol	Core Meaning	Use For
Addition	+	Combining, joining, associating	Bringing Ideas together, forming bonds or composites
Subtraction	-	Removing, separating, eliminating	Releasing, cutting away, removing an Idea or influence

Multiplication	x	Amplifying, increasing, expanding	Intensifying an Idea, scaling up its influence or effect
Division	/	Diminishing, apportioning, resolving	Reducing power, distributing, or completing a cycle

2.2 Formal Definitions

Addition (+)

Definition: Combining two or more Ideas so that all are present together in the resulting state.

Operational Meaning: When $A + B$ is performed, both A and B become simultaneously active or associated in the Mind. The result contains both Ideas in relationship.

Examples:

- Health + Confidence = A state where both health and confidence are actively present
- Knowledge + Action = Knowing combined with doing (applied knowledge)
- Goal + Plan = A desired outcome combined with a structured approach

Use Cases: Creating composites, establishing associations, joining previously separate elements, building complex states from simpler components.

Subtraction (-)

Definition: Removing or separating one Idea's influence from another.

Operational Meaning: When $A - B$ is performed, B's influence is removed from, or separated from, A. The result is A without B's presence or effect.

Examples:

- Health - Fear = Health with fear removed (unobstructed vitality)
- Confidence - Doubt = Confidence with doubt eliminated
- Goal - Obstacle = The goal with the blocking factor removed

Use Cases: Releasing attachments, removing blocks, eliminating negative influences, separating ideas that were previously joined.

Multiplication (x)

Definition: Amplifying an Idea by another factor, intensifying its presence or effect.

Operational Meaning: When $A \times B$ is performed, A is strengthened, expanded, or intensified by the factor of B. This is not simple addition but exponential or multiplicative increase.

Examples:

- Desire x Focus = Desire amplified by concentrated attention
- Skill x Practice = Skill multiplied through repeated application
- Intention x Emotion = Intention charged with emotional intensity

Use Cases: Intensifying effects, scaling up influence, reinforcing through repetition or charging, expanding the power of an existing Idea.

Division (/)

Definition: Reducing, distributing, or resolving an Idea's concentrated power.

Operational Meaning: When A / B is performed, A's concentrated power is divided, distributed, or resolved by factor B. This can mean completion of a cycle, reduction of intensity, or distribution across multiple targets.

Examples:

- Obsession / Release = Obsessive focus divided by releasing action (resulting in reduced fixation)
- Energy / Tasks = Available energy distributed across multiple tasks
- Cycle / Completion = A pattern resolved through reaching its natural end

Use Cases: Reducing excessive intensity, completing cycles, distributing concentrated energy, resolving or closing out processes.

2.3 Arithmetic Interaction with TKS Values

The operations can be applied to any TKS value (Elements, Foundations, or composite states). For example:

- **A2 + C2** = Spiritual attraction (Element A2) joined with emotional attraction (Element C2)—two Elements in different Worlds considered together.
 - **5b - 3b** = Mental composition (Foundation 5b) with mental aversion (Foundation 3b) removed—a Foundation-level subtraction in the mental aspect.
 - **Desire × Rhythm** = Desire amplified through repeated exposure—a state (Desire) intensified by rhythmic application.
 - **Vibration ÷ Time** = Resonance distributed/diminished over time—a vibratory pattern reduced or spread out across temporal exposure.
-

2.4 Invalid Mixed Forms (Noetic + Foundation)

Noetics (⁰...⁹) are operators, not standalone quantities.

Expressions of the form "Noetic + Foundation" (e.g., ¹ + 3d) are **not defined** in this formal system because Noetics are not values that can be added—they are transformation operators that modify values.

Correct Usage Pattern

To combine a Noetic aspect with a Foundation, first apply the Noetic operator to the Foundation, then perform arithmetic on the resulting tagged values:

Invalid	Correct
¹ + 3d	3d ¹ (Foundation 3d viewed through Noetic ¹)
² - 5b	5b ² then arithmetic on tagged result
Noetic + Element	Element ^{Noetic} OR (Element ^{Noetic}) + (Element ^{Noetic})

Rule

Noetics modify; they do not add. Always apply the Noetic superscript first, producing a tagged Foundation or Element, then combine tagged values using standard Tootra arithmetic operations.

3. The Four Worlds

The Four Worlds represent the levels or domains through which Ideas manifest, from most abstract/spiritual to most concrete/physical.

3.1 World Table

World	Letter	Level	Domain	Keywords
Atziluth	A	Spiritual	Archetypal/Divine	Source, soul, eternal, purpose, meaning
Briah	B	Mental	Creative/Intellectual	Thoughts, beliefs, concepts, analysis, logic
Yetzirah	C	Emotional	Formative/Astral	Feelings, emotions, intuition, desires
Assiah	D	Physical	Action/Material	Body, matter, actions, environment, concrete

3.2 World Descriptions

Atziluth (A) - Spiritual World

Definition: The highest level of reality; the domain of archetypes, divine principles, and ultimate meaning.

Characteristics:

- Closest to source/origin
- Deals with purpose, spiritual truth, and eternal patterns
- Changes here cascade down to all lower worlds
- Least dense, most abstract

Briah (B) - Mental World

Definition: The level of intellect, thought, belief, and conceptualization.

Characteristics:

- Domain of ideas as cognitive constructs
- Beliefs, frameworks, mental models
- Where spiritual principles become thinkable
- Mediates between spiritual insight and emotional response

Yetzirah (C) - Emotional World

Definition: The level of feeling, emotion, intuition, and formative patterns.

Characteristics:

- Domain of emotional experience
- Where mental concepts acquire feeling-tone
- Intuition and gut responses
- Shapes how thoughts become motivating desires

Assiah (D) - Physical World

Definition: The level of matter, body, action, and concrete manifestation.

Characteristics:

- Domain of physical reality
- Where all higher-world patterns finally manifest
- Actions, objects, environments, bodies
- The "densest" and most concrete level

3.3 Cross-World Dynamics

Downward Flow (A -> B -> C -> D): Spiritual principles (A) inform mental frameworks (B), which shape emotional patterns (C), which manifest as physical behaviors and realities (D).

Upward Flow (D -> C -> B -> A): Physical changes (D) can shift emotional states (C), which alter thought patterns (B), which can ultimately transform spiritual orientation (A).

Principle: Work at any level affects all others, but changes at higher levels (closer to A) create more fundamental and lasting transformations.

4. The 40 Elements

The **40 Elements** arise from the intersection of the 10 Noetics with the 4 Worlds: 10 x 4 = 40.

4.1 Element Notation

Format: **[World Letter][Noetic Number]**

Examples:

- **A1** = Spiritual Mind
- **B2** = Mental Positive
- **C5** = Emotional Female
- **D10** = Physical Idea

4.2 Complete 40 Elements Table

A-Series (Spiritual/Atziluth)

Element	Name	Core Meaning
A1	Spiritual Mind	Divine awareness, higher self consciousness
A2	Spiritual Positive	Divine love, spiritual attraction, grace
A3	Spiritual Negative	Spiritual aversion, divine judgment, karmic repulsion
A4	Spiritual Vibration	Soul frequency, spiritual resonance
A5	Spiritual Female	Soul receptivity, spiritual openness, karmic conditioning

A6	Spiritual Male	Divine authority, spiritual structure
A7	Spiritual Rhythm	Cosmic cycles, spiritual timing
A8	Spiritual Above	Divine causation, spiritual triggers
A9	Spiritual Below	Divine effects, spiritual results
A10	Spiritual Idea	Pure spirit, divine essence, archetypal content

B-Series (Mental/Briah)

Element	Name	Core Meaning
B1	Mental Mind	Ego, logical mind, analytical awareness
B2	Mental Positive	Optimism, positive thinking, mental attraction
B3	Mental Negative	Pessimism, negative beliefs, mental blocks
B4	Mental Vibration	Thought frequency, mental resonance
B5	Mental Female	Subconscious, creativity, imagination, mental conditioning
B6	Mental Male	Logic, structure, knowledge systems
B7	Mental Rhythm	Thought patterns, mental habits, cognitive cycles
B8	Mental Above	Mental triggers, thought causes
B9	Mental Below	Mental results, thought effects
B10	Mental Idea	Thoughts, concepts, mental content

C-Series (Emotional/Yetzirah)

Element	Name	Core Meaning
C1	Emotional Mind	Emotional awareness, feeling consciousness
C2	Emotional Positive	Joy, love, positive emotions
C3	Emotional Negative	Fear, anger, sadness, negative emotions
C4	Emotional Vibration	Emotional resonance, feeling frequency
C5	Emotional Female	Compassion, emotional receptivity, emotional conditioning
C6	Emotional Male	Emotional boundaries, feeling structure
C7	Emotional Rhythm	Mood cycles, emotional patterns
C8	Emotional Above	Emotional triggers, feeling causes
C9	Emotional Below	Emotional results, feeling effects
C10	Emotional Idea	Feelings, emotions, emotional content

D-Series (Physical/Assiah)

Element	Name	Core Meaning
D1	Physical Mind	Body awareness, physical consciousness
D2	Physical Positive	Health, vitality, physical attraction
D3	Physical Negative	Pain, illness, physical aversion
D4	Physical Vibration	Physical resonance, body frequency
D5	Physical Female	Physical receptivity, the body as container
D6	Physical Male	Physical structure, body/matter form
D7	Physical Rhythm	Circadian cycles, physical timing
D8	Physical Above	Physical triggers, environmental causes
D9	Physical Below	Physical results, bodily effects
D10	Physical Idea	Matter, objects, physical things

5. The 7 Foundations and 28 Sub-Foundations

The **7 Foundations** are the fundamental drives governing all human striving. When expressed across the 4 Worlds, they become the **28 Sub-Foundations** (7 x 4 = 28).

5.1 The 7 Core Foundations (Overview)

#	Short Name	Core Principle	Day	Planet
1	Association	All ideas are linked to other ideas through connection and resonance.	Sunday	Sun
2	Wisdom	All ideas are potentially knowable by Mind through directed attention and processing.	Monday	Moon
3	Life	All ideas require energy to exist and persist; vitality sustains all patterns.	Tuesday	Mars
4	Companionship	All ideas seek connection with resonant ideas; the drive toward relationship and union.	Wednesday	Venus
5	Power	All ideas can cause effects in other ideas; the capacity for influence and impact.	Thursday	Jupiter
6	Wealth	All ideas require structure and resources to maintain form and function.	Friday	Saturn
7	Continuation / Reproduction	The drive to extend life and pattern beyond the individual through reproduction, legacy, and	Saturday	Saturn

		propagation of one's line (genetic, emotional, mental, and spiritual).		
--	--	--	--	--

5.2 The 28 Sub-Foundations (Complete Matrix)

Notation System

Format: [Foundation Number][World Letter]

Component	Values	Meaning
Number	1-7	Which of the 7 Foundations
Letter	a, b, c, d	Which of the 4 Worlds

World Letter Mapping:

- **a** = Atziluth (Spiritual) - archetypal, divine, purpose-level
- **b** = Briah (Mental) - cognitive, intellectual, belief-level
- **c** = Yetzirah (Emotional) - feeling, intuitive, desire-level
- **d** = Assiah (Physical) - bodily, material, action-level

Complete 28 Sub-Foundations Table

ID	Foundation	World	Short Name	Formal Definition
1a	1-Association	A-Spiritual	Spiritual Association	Governs the archetypal interconnectedness of consciousness: synchronicities, soul-level resonances, and the perception of meaningful patterns linking spiritual truths.
1b	1-Association	B-Mental	Mental Association	Governs how thoughts connect to other thoughts: memory retrieval, concept formation, belief networks, and the linking of new information to existing knowledge.
1c	1-Association	C-Emotional	Emotional Association	Governs how feelings become linked to triggers: emotional conditioning, attachment patterns, empathic resonance, and learned emotional responses.
1d	1-Association	D-Physical	Physical Association	Governs behavioral habit chains: environmental cues linked to actions, muscle memory sequences, conditioned physical responses, and routine patterns.
2a	2-Wisdom	A-Spiritual	Spiritual Wisdom	Governs direct knowing of spiritual truths (gnosis): revelation, certainty about life purpose, and perception of cosmic laws without intellectual mediation.
2b	2-Wisdom	B-Mental	Mental Wisdom	Governs intellectual knowledge: understanding concepts, learning theories,

				acquiring cognitive skills, and comprehending how systems work logically.
2c	2-Wisdom	C-Emotional	Emotional Wisdom	Governs emotional intelligence: accurately identifying one's own feelings, understanding others' emotional states, and wisdom about relational dynamics.
2d	2-Wisdom	D-Physical	Physical Wisdom	Governs bodily knowledge: proprioception (knowing body position), interoception (sensing internal states), embodied skills, and practical know-how through action.
3a	3-Life	A-Spiritual	Spiritual Vitality	Governs the energy sustaining spiritual practices and purpose: the aliveness of meaning, vitality of devotion, and the force keeping spiritual principles active.
3b	3-Life	B-Mental	Mental Vitality	Governs cognitive energy: mental stamina for thinking and deciding, clarity versus brain fog, and the resources required for sustained intellectual work.
3c	3-Life	C-Emotional	Emotional Vitality	Governs the energy of emotional life: resilience to recover from difficult feelings, aliveness versus emotional flatness, and capacity for sustained emotional engagement.
3d	3-Life	D-Physical	Physical Vitality	Governs biological energy: physical health, bodily stamina, immune function, and the literal metabolic resources required for living and acting.
4a	4-Companionship	A-Spiritual	Spiritual Companionship	Governs connection to the transcendent: relationship with the divine, spiritual community (sangha), soul-level bonds, and the drive toward union with source.
4b	4-Companionship	B-Mental	Mental Companionship	Governs intellectual connection: shared ideas, collaborative thinking, mentorship relationships, and the meeting of minds around common concepts.
4c	4-Companionship	C-Emotional	Emotional Companionship	Governs emotional bonding: intimacy, affection, love as felt experience, friendship bonds, romantic attachment, and secure emotional connection.
4d	4-Companionship	D-Physical	Physical Companionship	Governs embodied togetherness: physical touch, shared space, proximity, co-located activity, and the body's experience of being with others.

5a	5-Power	A-Spiritual	Spiritual Power	Governs influence at the level of consciousness and meaning: spiritual authority, alignment with cosmic laws that amplifies impact, and the capacity to affect reality through will.
5b	5-Power	B-Mental	Mental Power	Governs influence through ideas: persuasion, intellectual authority, strategic thinking, and the capacity of thoughts to shape beliefs and decisions in self and others.
5c	5-Power	C-Emotional	Emotional Power	Governs influence through feeling: charisma, emotional magnetism, the capacity to move others' hearts, and leadership that operates through emotional resonance.
5d	5-Power	D-Physical	Physical Power	Governs material influence: physical strength, control of resources, positional authority, and the capacity to cause changes in the physical environment.
6a	6-Wealth	A-Spiritual	Spiritual Structure	Governs the architecture of meaning: coherent worldviews, spiritual frameworks that organize experience, and the structural order underlying consciousness itself.
6b	6-Wealth	B-Mental	Mental Structure	Governs cognitive organization: mental frameworks, planning systems, logical structures, and the organized arrangement of knowledge and thought processes.
6c	6-Wealth	C-Emotional	Emotional Structure	Governs emotional organization: regulation capacity, healthy boundaries, stable patterns of feeling, and the ordered arrangement of emotional life.
6d	6-Wealth	D-Physical	Physical Structure	Governs material organization: physical environment order, financial resources, tangible wealth, bodily systems, and the structural arrangement of physical life.
7a	7-Continuation	A-Spiritual	Spiritual Continuation	Governs the spiritual drive to continue a lineage or purpose beyond one lifetime: ancestry, covenant, soul-line, and the propagation of spiritual inheritance.
7b	7-Continuation	B-Mental	Mental Continuation	Governs the mental drive to create works, ideas, and structures that outlive the individual: legacy thinking, intellectual propagation, and memetic reproduction.
7c	7-Continuation	C-Emotional	Emotional Lust/Bonding	Governs the emotional drive of desire, attraction, and bonding that pulls the self

				toward merging and creation: passionate attachment and the urge to replicate one's feelings in others.
7d	7-Continuation	D-Physical	Physical Sex/Reproduction	Governs the bodily drive to reproduce, improve, and propagate one's genetic line: sexual union, fertility, and the physical mechanisms of procreation.

5.3 Distinguishing Similar Sub-Foundations

Several sub-foundations may appear similar at first glance. The following clarifications establish non-overlapping boundaries:

1b (Mental Association) vs. 2b (Mental Wisdom)

- **1b** governs *how* thoughts connect to each other (the linking mechanism)
- **2b** governs *what* is known (the content of knowledge)
- *Example:* 1b determines that "fire" links to "heat" in your mind; 2b determines whether you understand combustion chemistry.

3c (Emotional Vitality) vs. 4c (Emotional Companionship)

- **3c** governs the *energy* available for emotional life (resilience, aliveness)
- **4c** governs the *bonds* formed with others (attachment, intimacy)
- *Example:* You can have high 3c (emotional energy) but low 4c (few close bonds), or vice versa.

5b (Mental Power) vs. 2b (Mental Wisdom)

- **2b** governs *knowing* something (having the knowledge)
- **5b** governs *influencing* through that knowledge (persuading, strategizing)
- *Example:* 2b is understanding economics; 5b is convincing others to adopt your economic policy.

6d (Physical Structure) vs. 5d (Physical Power)

- **6d** governs *organized resources* (wealth, systems, material order)
- **5d** governs *capacity to cause physical change* (strength, control, making things happen)
- *Example:* 6d is having money in the bank; 5d is the ability to use that money effectively to achieve outcomes.

7a (Spiritual Rhythm) vs. 1a (Spiritual Association)

- **1a** governs *connections* between spiritual meanings (synchronicity, resonance)
- **7a** governs *timing* of spiritual unfolding (cycles, stages, cosmic rhythm)
- *Example:* 1a perceives that two events are meaningfully linked; 7a senses that now is the right time for spiritual action.

5.4 Foundation Integration Principles

5.4.1 Vertical Integration (Same Foundation, All Worlds)

Within a single Foundation, the four world-levels form a causal chain flowing from abstract to concrete:

A (Spiritual) → B (Mental) → C (Emotional) → D (Physical)

Spiritual principles inform mental frameworks, which shape emotional patterns, which manifest as physical behaviors and realities.

Implication: Blocks in higher worlds cascade down. If 5a (spiritual power) is weak, 5d (physical power) will feel hollow or unsustainable regardless of external resources. Address higher-world blocks first for lasting change.

Example: Someone trying to build physical wealth (6d) while lacking a coherent worldview (6a) or mental organization (6b) will struggle to maintain gains.

5.4.2 Horizontal Integration (Same World, All Foundations)

Within a single World, all 7 Foundations interact as an interdependent system:

1x → 2x → 3x → 4x → 5x → 6x → 7x (where x = a, b, c, or d)

Example (B-World / Mental):

- 1b (associations) determine what 2b (knowledge) you can access
- 2b requires 3b (mental energy) to acquire and use
- Learning often happens through 4b (intellectual community/mentorship)
- Knowledge enables 5b (persuasion/intellectual authority)
- Ideas need 6b (mental structure/planning) to be organized
- All mental activity operates within 7b (cognitive rhythms/timing)

Implication: Strengthening one Foundation in a World often requires supporting Foundations in that same World.

5.4.3 Diagonal Integration (Cross-World, Cross-Foundation)

Diagonal integration refers to interactions that cross both World (A/B/C/D) and Foundation (1-7) at the same time. These patterns are real and important, but they are not given as a fixed, exhaustive list in TKS; they are observed case-by-case in practice.

Illustrative examples (not exhaustive):

- 2a (spiritual wisdom) can unlock 6c (emotional structure): direct knowing reorganizes feeling patterns.
- 4d (physical touch/companionship) can energize 3a (spiritual vitality): embodied connection revitalizes meaning.
- 6b (mental structure/planning) can resolve 6c (emotional chaos): cognitive frameworks organize feelings.

In this formal manual, we treat diagonal integration as an **emergent** phenomenon rather than a fixed table. The core canonical structure of TKS is the 7x4 grid of Foundations and sub-foundations; diagonal patterns describe how seemingly distant parts of that grid can influence each other in practice. These leverage points are discovered through RPM diagnosis of specific situations.

6. The 22 Acquisitions and D/W/P Structure

The **22 Acquisitions** are the pathways connecting the 10 Noetic spheres on the TKS Tree of Life. They represent the specific states that must be acquired to move between different modes of consciousness and to manifest in each Foundation domain. The Acquisitions follow the fundamental **Desire/Wisdom/Power (D/W/P)** structure.

6.1 Acquisition Indexing Scheme

The 22 Acquisitions use two parallel indexing systems:

Symbolic IDs (Canonical)

The symbolic system maps each Acquisition to a Foundation and D/W/P category:

- **D1-D7** - Desire acquisitions: one per Foundation (the "want to")
- **W1-W7** - Wisdom acquisitions: one per Foundation (the "know how to")
- **P1-P7** - Power acquisitions: one per Foundation (the "can do")
- **A22** - Special acquisition: "Desire for desire" (meta-level, see below)

This yields 21 Foundation-specific acquisitions (7 x 3) plus 1 special acquisition = 22 total.

Engine IDs (Implementation)

The TKS engine maps each Acquisition to an integer 1-22:

Foundation	Desire (D)	Wisdom (W)	Power (P)
F1	1	2	3
F2	4	5	6
F3	7	8	9
F4	10	11	12
F5	13	14	15
F6	16	17	18
F7	19	20	21
Special	22	-	-

Pattern: For Foundation n (1-7), the engine IDs are:

- $D(n) = 3n - 2$
- $W(n) = 3n - 1$
- $P(n) = 3n$

In this manual, **symbolic IDs (D1, W3, P5, etc.) are canonical**; engine IDs are a secondary representation for implementation.

6.2 The D/W/P Triad

The three fundamental prerequisites for any manifestation:

Component	Symbol	Meaning	Card Type	Function
Desire	D	The initial impulse, want, will to bring an Idea into being	Kings	The "want to"
Wisdom	W	The know-how, understanding, blueprint required	Jacks	The "know how to"
Power	P	The ability, capacity, capability to actually do it	Queens	The "can do"

Core Principle: For any target Foundation or goal, stable manifestation requires all three components to be present and sufficiently developed. If any one of D/W/P is missing or significantly underdeveloped, manifestation in that domain will be blocked or unstable.

6.3 The 22 Acquisitions (Master Table)

Complete Acquisition Definitions

Engine ID	Symbolic ID	Category	Foundation	Short Label	Formal Definition
1	D1	Desire	F1 - Association	Desire for unity with God	The genuine want to merge with the divine, to be one with source, to transcend separation and experience fundamental interconnectedness.
2	W1	Wisdom	F1 - Association	Wisdom about unity	Understanding of how unity operates, knowledge of what true association with the divine entails, accurate models of spiritual connection.
3	P1	Power	F1 - Association	Power to achieve unity	The capacity to actually practice and sustain divine connection: meditation ability, devotional consistency, ego-transcendence capability.
4	D2	Desire	F2 - Wisdom	Desire for insight/knowledge	The genuine want to know, to understand, to perceive truth and acquire wisdom across all domains.
5	W2	Wisdom	F2 - Wisdom	Wisdom about knowing	Meta-knowledge: understanding how learning works, knowing how to acquire knowledge effectively,

					epistemological clarity.
6	P2	Power	F2 - Wisdom	Power to obtain knowledge	The capacity to actually learn: cognitive resources, access to information, ability to focus, process, and integrate new understanding.
7	D3	Desire	F3 - Life	Desire for health/vitality	The genuine want for life energy, physical health, vigor, and biological thriving.
8	W3	Wisdom	F3 - Life	Wisdom about health	Understanding of how health works: nutrition, exercise, rest, stress management, what the body needs to thrive.
9	P3	Power	F3 - Life	Power to create/maintain health	The capacity to actually achieve and sustain health: physical capability, resources for healthy living, discipline for health behaviors.
10	D4	Desire	F4 - Companionship	Desire for companionship/love	The genuine want for connection, intimacy, friendship, and loving relationship with others.
11	W4	Wisdom	F4 - Companionship	Wisdom about relationships	Understanding of how relationships work: communication, attachment, boundaries, what makes bonds healthy and sustainable.

12	P4	Power	F4 - Companionship	Power to form/maintain bonds	The capacity to actually create and sustain relationships: social skills, emotional availability, time and energy for connection.
13	D5	Desire	F5 - Power	Desire for worldly power/influence	The genuine want for influence, control, authority, and the ability to cause effects in the world.
14	W5	Wisdom	F5 - Power	Wisdom about power	Understanding of how power operates: its nature, consequences, ethics, strategies for acquiring and wielding influence responsibly.
15	P5	Power	F5 - Power	Power to act effectively in power structures	The capacity to actually wield influence: positional authority, resources, skills, and the ability to execute within systems of power.
16	D6	Desire	F6 - Wealth	Desire for material resources	The genuine want for physical resources, money, possessions, and material stability.
17	W6	Wisdom	F6 - Wealth	Wisdom about wealth/resources	Understanding of how material acquisition works: economics, value creation, resource management, what generates and preserves wealth.
18	P6	Power	F6 - Wealth	Power to acquire/manage resources	The capacity to actually generate and maintain wealth: skills,

					opportunities, financial discipline, ability to create and exchange value.
19	D7	Desire	F7 - Continuation	Desire for continuation/reproduction	The genuine want to extend life and pattern beyond the self: sexual desire, legacy drive, urge to propagate one's line.
20	W7	Wisdom	F7 - Continuation	Wisdom about continuation	Understanding of how continuation works: reproduction, legacy creation, what allows patterns to persist beyond the individual.
21	P7	Power	F7 - Continuation	Power to continue/reproduce	The capacity to actually propagate: fertility, creative capability, resources for legacy-building, ability to create lasting works or offspring.
22	A22	Meta- Desire (D*)	Global / Cross- Foundational	Desire for desire	The activation of the desire to desire itself: the rekindling, intensification, or redirection of Desire across existing D/W/P channels. A22 is the engine of wanting itself— when active, it recharges or re-aims desire. Geometrically represented as the polarity loop between Noetic 6 (Male) and Noetic 5 (Female), connecting structured pattern to receptive field.

A22: The Meta-Desire (Special Case)

A22 is unique in the Acquisition system. Unlike D1-D7/W1-W7/P1-P7, which are bound to specific Foundations, A22 is a **cross-foundational Acquisition** that can be invoked in service of any Foundation whose Desire channel has gone cold, fragmented, or mis-aimed.

Key characteristics:

- **Category:** Meta-Desire (D*) — Desire about Desire itself
- **Scope:** Global, not bound to any single Foundation (1-7)
- **Function:** Modulates the entire D/W/P stack by intensifying or re-igniting Desire across other Acquisitions
- **Tree Position:** Connects Noetic 6 (Male) to Noetic 5 (Female), representing the feedback loop between structured pattern and receptive field

There is no W22 or P22. A22 is not part of an extended D22/W22/P22 triad; it is a unique meta-Desire node that stands alone. It modulates all existing triads rather than forming its own.

Tree of Life Connections (Reference)

The Acquisitions also map to paths on the TKS Tree of Life, connecting Noetic spheres. These connections are preserved from the source material.

The Tree as a Multigraph: The TKS Tree of Life is formally a *multigraph*—the same pair of Noetic nodes (e.g., Mind 1 ↔ Vibration 4) can have multiple edges connecting them. Each edge is a distinct Acquisition with its own name, semantic role, and D/W/P classification. Apparent "duplicate" paths in the diagram are not errors; they indicate multiple distinct flows of consciousness using the same geometric route.

Example: "Desire to be God" (D1) and "Desire for insight wisdom" (D2) may both flow between Mind and Vibration, but they point consciousness toward different classes of goal—one toward unity/association, the other toward knowledge/understanding.

Acquisition	Tree Path
D1 (1)	Mind 1 → Vibration 4
W1 (2)	Mind 1 → Positive 2
P1 (3)	Mind 1 → Negative 3
D2 (4)	Mind 1 → Vibration 4
W2 (5)	Positive 2 → Vibration 4
P2 (6)	Negative 3 → Vibration 4
D3 (7)	Vibration 4 → Male 6
W3 (8)	Positive 2 → Male 6
P3 (9)	Negative 3 → Female 5
D4 (10)	Female 5 → Rhythm 7
W4 (11)	Vibration 4 → Male 6
P4 (12)	Vibration 4 → Female 5

D5 (13)	Above/Cause 8 → Idea 10
W5 (14)	Male 6 → Rhythm 7
P5 (15)	Rhythm 7 → Below/Effect 9
D6 (16)	Above/Cause 8 → Idea 10
W6 (17)	Female 5 → Below/Effect 9
P6 (18)	Rhythm 7 → Above/Cause 8
D7 (19)	Below/Effect 9 → Idea 10
W7 (20)	Male 6 → Above/Cause 8
P7 (21)	Rhythm 7 → Above/Cause 8
A22 (22)	Male 6 → Female 5

6.4 D/W/P Triads Per Foundation

Each Foundation (1-7) has three key Acquisitions forming its D/W/P triad:

- **D(n)** - Desire: the wanting, attraction, motivational pull toward that domain
- **W(n)** - Wisdom: the understanding, accurate models, knowing how that domain works
- **P(n)** - Power: the capacity, skill, resources, authority to act in that domain

For stable manifestation in any Foundation, **all three must be sufficiently present**. Missing any one creates instability or outright blockage.

Foundation Triad Summary Table

Foundation	D: Desire for...	W: Wisdom about...	P: Power to...
F1 - Association	Unity with God/source	How unity and divine connection operate	Practice and sustain spiritual connection
F2 - Wisdom	Knowledge and insight	How knowing and learning work	Actually acquire and integrate knowledge
F3 - Life	Health and vitality	How health and energy work	Create and maintain biological thriving
F4 - Companionship	Love and connection	How relationships and bonding work	Form and sustain meaningful bonds
F5 - Power	Influence and control	How power and authority operate	Act effectively within power structures
F6 - Wealth	Material resources	How value and wealth are created/preserved	Acquire and manage material resources
F7 - Continuation	Legacy and reproduction	How continuation and propagation work	Actually reproduce, create lasting legacy

Application to Sub-Foundations

The D/W/P requirement applies at every level of the 28 sub-foundations. For any sub-foundation (e.g., 3d - physical health), all three components must be evaluated within that specific World:

Example: 3d (Physical Health)

- **D(3d):** Genuine desire for physical health and bodily vitality
- **W(3d):** Knowledge of nutrition, exercise, sleep, and what the physical body needs
- **P(3d):** Actual capacity to implement health behaviors (time, resources, physical ability)

If someone has D(3d) and W(3d) but lacks P(3d) (e.g., no time for exercise, no money for healthy food), manifestation of physical health will be blocked until P(3d) is addressed.

6.5 The 12 Prerequisite States (Developmental Phases)

The **12 Prerequisite States** describe the developmental phases that Desire, Wisdom, and Power each pass through. They are represented by the face cards (Kings, Queens, Jacks) and describe *how developed* each D/W/P component currently is—not *what* the component is.

Relationship to Acquisitions

- The **22 Acquisitions** define *what* Desire, Wisdom, and Power mean for each Foundation
- The **12 Prerequisite States** describe *how mature* each D/W/P is at any given time

Think of it this way: D5 (Desire for worldly power) is the *acquisition*. The King of Hearts (Strong Desire) vs. King of Diamonds (Absent Desire) describes the *state* of that acquisition.

The Three Cycles

Desire Cycle (Kings - The Will)

Phase	Card	Glyph	Level	Description
Beginning	King of Clubs	♣	25%	Desire is dawning; the want is emerging but not yet strong
Strong	King of Hearts	♥	100%	Desire is fully engaged; powerful motivational pull
Weakening	King of Spades	♠	50%	Desire is fading; motivation declining
Absent	King of Diamonds	♦	0%	No desire exists; the want is gone

Power Cycle (Queens - The Ability)

Phase	Card	Glyph	Level	Description
Birth	Queen of Diamonds	♠	10%	Ability is just emerging; potential recognized but undeveloped
Adolescent	Queen of Clubs	♣	40%	Ability has progressed but not yet fully effective
Mature	Queen of Hearts	♥	100%	Ability is fully developed and effective for the task
Waning	Queen of Spades	♠	20%	Capability is diminishing; losing effectiveness

Wisdom Cycle (Jacks - The Know-How)

Phase	Card	Glyph	Level	Description
Learning	Jack of Clubs	♣	25%	Knowledge is being acquired; studying but not yet competent
Knowing	Jack of Diamonds	♦	50%	Knowledge is present but application may be lacking
Understanding	Jack of Spades	♠	75%	Working knowledge; can apply and explain
Mastered	Jack of Hearts	♥	100%+	Full comprehension and mastery; can teach and innovate

Note: The zodiac glyphs (♈, ♉, etc.) are used purely as unique identifiers within TKS, not for their traditional astrological meanings.

Using States in Diagnosis

When diagnosing a blocked manifestation via RPM:

1. Identify which Foundation is the target (e.g., F5 - Power)
2. Check the state of D5, W5, P5 using the phase descriptors
3. The first component below threshold becomes the sub-desire to address

Example: Someone wants worldly influence (F5) but:

- D5 is at King of Hearts (Strong) ✓
- W5 is at Jack of Clubs (Learning) - knows they need to learn more
- P5 is at Queen of Clubs (Adolescent) - has some capability but not mature

The RPM would identify W5 (Wisdom about power) as the first block to address, since moving from Learning to Understanding/Mastered would unlock more effective action.

States as Qualitative Overlays (Not Separate Acquisitions)

The 12 Prerequisite States are qualitative overlays on top of the Acquisitions, not separate Acquisitions themselves.

Key clarifications:

- **States do not map 1:1 to specific Acquisitions.** There is no rule like "Jack of Hearts always means W2."
- **States are reusable evaluation lenses** that can be applied to any D/W/P Acquisition across any Foundation.
- **States describe developmental maturity:** King = mature/strong, Queen = operational capability, Jack = learning/partial/immature.

How States interact with RPM:

In RPM diagnosis, the status function $s(a)$ considers both presence and developmental level:

- **$s(a) = 1$** (satisfied) only when the Acquisition's associated State has reached sufficiency (King/Queen level for full manifestation)
- **$s(a) = 0$** (unmet) if the State is adolescent, learning, or immature (Jack level or below)

A Jack state implies partial acquisition—the Acquisition exists but is not yet mature enough to support stable manifestation. RPM treats this as $s(a) = 0$ until development is complete.

Example State applications (illustrative, not exhaustive):

- King of Hearts on D3 = mature, strong Desire for health
 - Queen of Clubs on P6 = adolescent Power to acquire wealth (progressing but not fully effective)
 - Jack of Diamonds on W4 = Knowing Wisdom about relationships (present but application lacking)
-

7. The Recursive Prerequisite Model (RPM) - Formal Structure

The **Recursive Prerequisite Model (RPM)** is the TKS diagnostic algorithm for identifying exactly what is blocking manifestation and precisely what needs to be addressed.

7.1 Core Concept

RPM Principle: For any goal, if any of D/W/P is missing or significantly underdeveloped, manifestation will either fail or collapse under stress. The RPM systematically identifies the first unmet prerequisite and traces it to an actionable root.

How RPM Uses Acquisitions

RPM operates on the 22 Acquisitions defined in Section 6:

- For each **Foundation F(n)**, the required Acquisitions are the D/W/P triad: **{D(n), W(n), P(n)}**
- Example: For F5 (Power), the required set is {D5, W5, P5} = engine IDs {13, 14, 15}
- The **12 Prerequisite States** (Kings/Queens/Jacks) describe the *developmental level* of each Acquisition

RPM checks whether each D/W/P Acquisition is present and sufficiently developed, then recursively decomposes any blocks until reaching actionable steps.

7.2 Formal Definition

Sets

- **F** = {F1, F2, ..., F7} - The set of 7 Foundations (or their 28 sub-foundations)
- **A** = {D1, W1, P1, D2, W2, P2, ..., D7, W7, P7, A22} - The set of 22 Acquisitions
- **SD** = {sd1, sd2, ...} - The set of Sub-Desires generated during decomposition

Functions

- **triad: F -> P(A)** - Maps each Foundation to its D/W/P triad: $\text{triad}(F_n) = \{D_n, W_n, P_n\}$
 - **s: A -> [0, 1]** - The Status function; returns the developmental level of an Acquisition (0 = absent, 1 = fully present)
 - **m: A -> P(A)** - The Decomposition function; maps an unmet Acquisition to its prerequisite Acquisitions
 - **threshold: A -> [0, 1]** - The minimum level required for manifestation (typically ~0.75 for stable manifestation)
-

7.3 The RPM Algorithm

```
ALGORITHM: RPM_Diagnose(goal in F)
```

```

INPUT: goal (Prime Desire)

1. required_acquisitions <- f(goal)

2. FOR EACH acquisition a IN required_acquisitions:

3.     IF s(a) = 0 THEN                                // Acquisition unmet
4.         sub_acquisitions <- m(a)                    // Decompose
5.         IF sub_acquisitions = empty THEN
6.             RETURN a                                // Base case: directly actionable
7.         ELSE
8.             FOR EACH sub_a IN sub_acquisitions:
9.                 IF s(sub_a) = 0 THEN
10.                    RETURN RPM_Diagnose(sub_a) // Recurse
11.                END IF
12.            END FOR
13.        END IF
14.    END IF

15. END FOR

16. RETURN NULL                                        // All prerequisites met

```

7.4 Properties of the RPM System

Termination Guarantee

The recursion terminates because the decomposition function m eventually reaches atomic Acquisitions (where $m(a) = \text{empty}$). These correspond to states achievable through direct Noetic action.

Determinism

Given identical input states (same goal, same $s()$ values), the algorithm produces identical output. No mystical ambiguity.

Completeness

Every blocked goal can be traced to specific unmet base-level Acquisitions. Nothing is "inexplicable."

Soundness

If RPM_Diagnose returns NULL, then by definition all prerequisites are satisfied and the goal should manifest (barring external interference or misdiagnosis).

7.5 The RPM Process (Practical Steps)

Step 1: Define Prime Desire

What do you actually want? Be specific. Identify the relevant Foundation(s).

Step 2: Scan Prerequisites

Starting with Desire (Kings), assess your current state for the Prime Desire against the 12 Prerequisites. Which state accurately describes your current level of Desire, Power, and Wisdom for this specific goal?

Step 3: Identify the Block

Is any Prerequisite state insufficient for manifestation? The first insufficient Prerequisite you hit in the D -> W -> P sequence is your Block.

Step 4: Formulate Sub-Desire

The Block automatically becomes your new goal - the Sub-Desire to acquire the necessary Prerequisite state.

Step 5: Recurse

Apply the RPM scan (Steps 2-4) to this Sub-Desire. Keep drilling down until you hit a Prerequisite Block that can be directly addressed through Noetic action.

Step 6: Execute Noetic Action

Perform the necessary actions (guided by Mind and informed by Wisdom) to shift the state of the base-level blocked Prerequisite.

Step 7: Ascend & Re-Scan

Once a Sub-Desire is fulfilled, move back up the Desire Tree to the previous level and re-scan the Prerequisites from that point. Repeat until the Prime Desire is achieved.

7.6 The Desire Tree

The **Desire Tree** is a visual map of the RPM process for a specific goal:

- **Root** = Prime Desire
- **Each Node** = A Prerequisite state (e.g., King of Hearts, Queen of Diamonds, Jack of Clubs)
- **Each Branch** = An unsatisfied Prerequisite, leading to a Sub-Desire node
- **Leaves** = Base-level Blocks requiring direct Noetic action

7.7 RPM Condition for Stable Manifestation

For a given Foundation F(n), stable manifestation requires all three Acquisitions from the triad to be sufficiently developed:

Acquisition	Minimum State	Minimum Level	Meaning
D(n)	King of Hearts (Strong)	~100%	Genuine, powerful desire is present
W(n)	Jack of Spades (Understanding)	~75%	Working knowledge; can apply effectively
P(n)	Queen of Hearts (Mature)	~100%	Full capability to execute

Cross-Reference to Section 6

- **D(n)** refers to the Desire Acquisition for Foundation n (see Section 6.3, rows 1, 4, 7, 10, 13, 16, 19)

- **W(n)** refers to the Wisdom Acquisition for Foundation n (see Section 6.3, rows 2, 5, 8, 11, 14, 17, 20)
- **P(n)** refers to the Power Acquisition for Foundation n (see Section 6.3, rows 3, 6, 9, 12, 15, 18, 21)
- The **12 Prerequisite States** (Section 6.5) describe developmental phases of each

If any one is missing or significantly underdeveloped, manifestation will either fail or collapse under stress.

7.8 Progress Tracking Extensions

Weight Function

w: A -> [0, 1] - Assigns relative importance to each Acquisition

Progress Function

p: A -> [0, 1] - Measures partial completion (0 = unstarted, 1 = complete)

Total Progress Calculation

```
Total_Progress(goal) = SUM(w(ai) x p(ai)) / SUM(w(ai))
for all ai in the expanded goal tree
```

8. Cross-Reference Tables

8.1 Foundation → D/W/P Acquisitions (Selected Physical Examples)

This table highlights four high-frequency physical sub-foundations (3d, 4d, 5d, 6d) as quick-reference examples. It is not an exhaustive list of all 28 sub-foundations.

Foundation	Target	D Acquisition	W Acquisition	P Acquisition
3d	Physical Health	D3: Desire for health	W3: Wisdom for health	P3: Power for health
4d	Physical Companionship	D4: Desire for connection	W4: Wisdom for connection	P4: Power for connection
5d	Physical Power	D5: Desire for influence	W5: Wisdom for influence	P5: Power for influence
6d	Material Resources	D6: Desire for wealth	W6: Wisdom for wealth	P6: Power for wealth

For the full mapping of Foundations and their Desire/Wisdom/Power triads, see Sections 6.3 ("The 22 Acquisitions – Master Table") and 6.4 ("D/W/P Triads Per Foundation").

8.2 Noetic -> Element by World

Noetic	A (Spiritual)	B (Mental)	C (Emotional)	D (Physical)
1 Mind	A1	B1	C1	D1

2 Positive	A2	B2	C2	D2
3 Negative	A3	B3	C3	D3
4 Vibration	A4	B4	C4	D4
5 Female	A5	B5	C5	D5
6 Male	A6	B6	C6	D6
7 Rhythm	A7	B7	C7	D7
8 Above	A8	B8	C8	D8
9 Below	A9	B9	C9	D9
10 Idea	A10	B10	C10	D10

8.3 Prerequisite State Quick Reference

Category	25%	50%	75%+	100%	0%
Desire (Kings)	Clubs (Rising)	Spades (Waning)	-	Hearts (Strong)	Diamonds (Absent)
Power (Queens)	-	-	-	Hearts (Mature)	-
Wisdom (Jacks)	Clubs (Learning)	Diamonds (Knowing)	Spades (Understanding)	Hearts (Mastered)	-

9. Noetic Fractals – Structured Noetic Sequences

Noetic fractals are structured sequences of Noetic actions applied to a target Idea, Element, or Foundation. They are the "programs" or protocols of TKS: reusable patterns that describe **how** Mind repeatedly relates to an Idea over time.

A single Noetic ($\wedge 0 \dots \wedge 9$) describes one kind of Mind–Idea relation (awareness, Positive, Negative, Vibration, Female/Male, Rhythm, Cause/Effect). A **Noetic fractal** describes a **pattern** of these relations applied in sequence and, potentially, in repetition.

9.1 Definition and Notation

A **Noetic fractal pattern** is a finite, ordered sequence of Noetic indices:

- Let $F = (n_1, n_2, \dots, n_k)$ where each $n_i \in \{0, 1, \dots, 9\}$.

We write this pattern as:

- Unicode form: $\langle n_1:n_2:\dots:n_k \rangle$
- ASCII form: `<<n1:n2:...:nk>>`

These two notations are equivalent. The Unicode form $\langle \dots \rangle$ is the canonical mathematical notation; the ASCII form `<<...>>` is used where Unicode is inconvenient (plain-text, code).

Examples:

- $\langle 1:4:7 \rangle$ – awareness $\rightarrow$ vibration $\rightarrow$ rhythm
- $\langle 8:1:4 \rangle$ – cause $\rightarrow$ awareness $\rightarrow$ vibration
- $\langle 2:3 \rangle$ – positive $\rightarrow$ negative (dual polarity pattern)

A **Noetic fractal operator** is the function induced by such a pattern when applied to a TKS value (Idea, Element, Foundation, or composite).

9.2 Applying a Fractal to a Value

Let X be any TKS value that can accept Noetic application (for example: an Element like A2, a Foundation like 3d, or a composite state).

Given a fractal pattern $F = \langle n_1 : n_2 : \dots : n_k \rangle$, the **single-pass application** of F to X is defined as:

$$F(X) = \langle n_1 : n_2 : \dots : n_k \rangle(X) := (((X^{n_1})^{n_2}) \dots^{n_k})$$

That is:

1. Start with X .
2. Apply Noetic n_1 to get X^{n_1} .
3. Apply Noetic n_2 to that result, and so on, until n_k .

Order is left-to-right: $\langle 1:4:7 \rangle(3d)$ means:

1. Apply $\wedge 1$ (Mind/Awareness) to 3d
2. Then apply $\wedge 4$ (Vibration) to that result
3. Then apply $\wedge 7$ (Rhythm) to that result

Special cases:

- If $k = 1$, $\langle n_1 \rangle(X) = X^{n_1}$ (a single Noetic application).
- If $k = 0$ (empty pattern), we treat F as the identity operator: it leaves X unchanged.

9.3 Composition of Fractals

Two fractals can be composed by **concatenating** their Noetic sequences.

Let:

- $F = \langle a_1 : \dots : a_m \rangle$
- $G = \langle b_1 : \dots : b_n \rangle$

Then the composite fractal $G \circ F$ (apply F , then G) is:

$$(G \circ F)(X) = G(F(X)) = \langle a_1 : \dots : a_m : b_1 : \dots : b_n \rangle(X)$$

Thus:

- Composition = sequence concatenation left-to-right.
- There is an identity fractal: the empty pattern $\langle \rangle$, which leaves any X unchanged.

- A single Noetic $\langle n \rangle$ is a fractal of length 1.

In practice, fractals may be **simplified** using Noetic identities (e.g., identity Noetic, dual cancellations) where defined elsewhere in the TKS composition rules. This manual does not introduce a full 10×10 composition table here; it only defines the sequencing behavior.

9.4 Iteration and Dynamic Behavior

A key use of Noetic fractals is to describe **repeated** patterns of Mind–Idea interaction over time.

Given a fractal pattern F and initial value X , define:

- $F^{(1)}(X) = F(X)$
- $F^{(2)}(X) = F(F(X))$
- $F^{(m)}(X) = F(F^{(m-1)}(X))$ for $m \geq 2$

We are often interested in the **long-term behavior** of the sequence:

$X, F^{(1)}(X), F^{(2)}(X), F^{(3)}(X), \dots$

Based on this behavior, we classify fractals (relative to a class of inputs) into **behavioral types**:

- **Stabilizing fractal**
 - Repeated application of F drives the state toward a stable configuration.
 - After enough iterations, the system approaches a fixed point or a small, bounded region of states.
 - Intuitively: "this pattern tends to settle the system."
- **Amplifying fractal**
 - Repeated application of F tends to increase activation or intensity in a domain (e.g., foundation activations, emotional amplitude), often until some practical limit or saturation is reached.
 - Intuitively: "this pattern tends to build and intensify."
- **Oscillatory fractal**
 - Repeated application of F cycles the state among a finite set of configurations (periodic behavior) without settling to a single fixed point.
 - Intuitively: "this pattern tends to alternate or flip between modes."

These classifications are **behavioral**: the same abstract pattern may be stabilizing for one target (e.g., 3d health in a calm context) and amplifying for another (e.g., 5d power in a volatile context). In practice, TKS practitioners empirically test and catalogue which fractals behave in which way for particular Foundations and goals.

9.5 Examples of Noetic Fractals in TKS Practice

Some fractal patterns occur frequently in TKS work. A few illustrative examples:

- **$\langle 1:4:7 \rangle$ – Awareness → Vibration → Rhythm**
 - Often used as a **harmonizing/stabilizing** pattern.
 - 1 (Mind/Awareness): bring the Idea or Foundation into clear consciousness.
 - 4 (Vibration): energize the relation, give it resonance.
 - 7 (Rhythm): establish repeated exposure or practice, turning it into a habit or pattern in time.
- **$\langle 8:1:4 \rangle$ – Cause → Awareness → Vibration**

- A **cause-oriented** pattern:
 - 8 (Above/Cause): identify the initiating Idea or trigger.
 - 1 (Mind/Awareness): make it conscious.
 - 4 (Vibration): amplify the resonance of the chosen cause.
- **(5:6:9) – Female → Male → Effect**
 - A **polarity and manifestation** pattern:
 - 5 (Female): receptive field, Ideals the Mind is composed of.
 - 6 (Male): projecting Idea structure into form.
 - 9 (Below/Effect): the concrete Idea or manifestation that results.

These are examples, not an exhaustive catalogue. In practice, entire libraries of fractals are constructed for specific Foundations (health, relationships, power, material flow, continuation) and for specific ritual or meditative protocols.

9.6 Relationship to Noetics, Arithmetic, and RPM

Noetic fractals sit **on top of** the basic structures defined in earlier sections:

- **Noetics (Section 1):**
 - Define *what kind* of Mind–Idea relation each index (0–9) represents.
- **Tootra Arithmetic (Section 2):**
 - Defines how multiple Ideas or states combine, separate, amplify, or resolve ($+$ $-$ $\times$ $\div$).
- **Foundations and Acquisitions (Sections 5–6):**
 - Define *what* is being transformed (life domains, Desire/Wisdom/Power states, meta-Desire A22).
- **RPM (Section 7):**
 - Decides **when** a transformation is allowed, by checking whether prerequisite Acquisitions are present and mature enough.

Within that framework:

- A **fractal pattern** ($\langle \dots \rangle$) specifies **how** Noetics are applied to a chosen target (Element, Foundation, or state) over time.
- RPM determines whether the prerequisites (Desire/Wisdom/Power) are in place for that fractal to be effective.
- Tootra arithmetic describes how results of multiple fractal applications can be combined or disentangled.

Thus, a TKS protocol for manifestation typically has the structure:

1. Choose the target Foundation / sub-foundation (e.g., 3d physical health).
2. Diagnose D/W/P acquisitions and States using RPM.
3. Select an appropriate Noetic fractal (or sequence of fractals).
4. Apply the fractal over time (meditation, practice, exposure, action).
5. Use Tootra arithmetic and RPM to interpret and adjust the evolving state.

This section defines the formal behavior of the fractals themselves; catalogues of specific, named fractals for practical work belong in separate application manuals or curricula built on top of this core formalism.

Appendix A – Summary of Resolved Decisions

This appendix summarizes key doctrinal and formal decisions that were previously flagged as ambiguous in early drafts of TKS v6.1 and have now been resolved in this Clean Definitions edition.

A.1 Cross-Type Tootra Arithmetic

Issue: How should operations like "Noetic + Foundation" be treated?

Decision: Noetics ($\wedge 0 \dots \wedge 9$) are operators, not standalone quantities. Expressions of the form $\wedge 1 + 3d$ or "Noetic + Foundation" are not defined. The correct pattern is:

- Apply the Noetic to a value: $3d^{\wedge 1}$, $A2^{\wedge 4}$, etc.
- Then use arithmetic ($+$ $-$ $\times$ $\div$) on the resulting Ideas/states.

This is formalized in Section 2.4 ("Invalid Mixed Forms (Noetic + Foundation)").

A.2 Foundation 7 Naming

Issue: Different drafts referred to Foundation 7 as "Lust", "Sex/Reproduction", "Rhythm of Purpose", etc.

Decision: The canonical short name for Foundation 7 is:

- **Foundation 7 – Continuation / Reproduction**

Its four sub-foundations are:

- 7a – Spiritual Continuation
- 7b – Mental Continuation
- 7c – Emotional Lust/Bonding
- 7d – Physical Sex/Reproduction

See Section 5 for the full table and definitions.

A.3 Acquisition 22 (A22)

Issue: The role of Acquisition 22 ("Desire for desire") was unclear: is it tied to one Foundation, and does it have W22/P22 companions?

Decision:

- **Symbolic ID:** A22
- **Category:** Meta-Desire (D*)
- **Scope:** Global / cross-foundational
- **Function:** A22 is the activation of the desire to desire itself—the rekindling, intensification, or redirection of Desire across existing D/W/P channels. It is the engine of wanting itself.
- **Tree position:** Geometrically represented as the polarity loop between Noetic 6 (Male) and Noetic 5 (Female), connecting structured pattern to receptive field.
- **No W22/P22:** There is no W22 or P22; A22 stands alone as a unique meta-Desire.

See Section 6.3 and the subsection "A22: The Meta-Desire (Special Case)" for details.

A.4 States vs Acquisitions

Issue: Are the 12 Prerequisite States (Kings/Queens/Jacks) separate Acquisitions, or how do they relate to D/W/P?

Decision:

- The 12 Prerequisite States are **qualitative overlays**, not new Acquisitions.
- They describe developmental maturity levels (e.g., King = mature/strong, Queen = functional/operational, Jack = learning/immature).
- They can be applied as evaluation lenses to any Acquisition (D/W/P) in any Foundation.

In the RPM formalism, the status function $s(a)$ considers both:

- whether the Acquisition is present, and
- whether its State has reached sufficiency:
 - $s(a) = 1$ only when the associated State is mature enough (King/Queen level)
 - $s(a) = 0$ when the Acquisition is still at a Jack/immature level.

See Section 6.5 ("The 12 Prerequisite States") for full details.

A.5 Tree of Life as Multigraph

Issue: Some paths in the Acquisition Tree appear to connect the same Noetics more than once, suggesting "duplicate" edges.

Decision:

- The TKS Tree of Life is formally a **multigraph**: the same pair of Noetic nodes can have multiple edges.
- Each edge represents a distinct Acquisition with its own name, semantic role, and D/W/P classification.
- Apparent duplicates are not errors; they reflect multiple distinct flows of consciousness sharing the same geometric route.

See Section 6.3 and the Tree-of-Life discussion for more.

These resolutions are now baked into the main body of the Clean Definitions manual. This appendix records them historically so that later readers can see which questions were consciously decided and how.

Appendix B: Glossary Quick Reference

Term	Definition
Noetic	One of ten fundamental operations of consciousness (0-9)
Element	A Noetic expressed at a specific World-level (40 total)
Foundation	One of seven fundamental life drives (1-7)
Sub-Foundation	A Foundation expressed in a specific World (28 total)
Acquisition	A pathway/state required to move between Noetic spheres (22 total)
D/W/P	Desire/Wisdom/Power - the three prerequisites for manifestation

RPM	Recursive Prerequisite Model - the diagnostic algorithm
Prime Desire	The main goal being pursued
Sub-Desire	A subordinate goal that emerges when a Prerequisite is blocked
Desire Tree	Visual map of the RPM process showing all blocks and sub-desires

End of Formal Manual

Document Version: v6.1 Clean Definitions **Based On:** SUPERIORITY_OF_TKS_COMPLETE_MANUSCRIPT.md **Purpose:** Editorial clarification only; no doctrinal changes **Status:** Draft for author review
